The Every Student Succeeds Act (ESSA), Illinois Balanced Accountability Model (IBAM), adoption of the SAT, and new college and career readiness indicators will have significant implications for Illinois school districts. This seminar will present a systemic solution that:

- Aligns assessments grades 3-11 to the SAT
- Incorporates personalized indicators of performance beyond test scores, including motivation, grit, interests, and goals
- Operationalizes college and career readiness pathways at the student level

Come learn how the ECRA-Measured Progress partnership can help your district transition its assessment system to align to emerging best practices and satisfy future mandates.
