The scope of COVID-19 related school closures across the United States is unprecedented, leaving educators, students, and families to navigate their way through the challenges of shifting learning from the classroom to home. ECRA's Remote Learning Survey is designed to collect feedback from students, parents, and educators about their experiences during these challenging times. The survey results will provide district administrators with insights to the needs and perceptions of stakeholders and inform planning for continuous improvement of remote learning.

The online surveys are brief and simple to administer. No requirement is needed beyond a computer or mobile device and internet connection. The surveys are available in English or Spanish for students and parents. Audio option is also available.
