Student Learning Objectives (SLOs)

Action research

INTENDED USERS

Classroom teachers

Interventionists

Instructional aides

Overview

Research has shown that great teachers have the most immediate and long-term impact on student success. Few school improvement efforts are as effective as investing in the development of teachers and providing teachers the tools they need to be responsive to individual student needs. In an era where the definition of student success is broadening, teachers need access to multi-dimensional and personalized data on students so they can engage and motivate students to reach their full potential. Student information systems are ineffective in providing teachers the tools they need to be more effective in the classroom.

The My Students app provides teachers the information needed to focus their efforts toward what truly matters for individual students. It affords teachers access to critical data, without distracting teachers from focusing on delivering high quality instruction.

Feature Highlights

- Create and manage dynamic instructional rosters
- Monitor students against personalized achievement targets
- Generate student profile reports
- Generate progress monitoring reports by instructional rosters
- Create, manage, and report Student Learning Objectives (SLOs)
- Evaluate the impact of instructional strategies

Create and manage dynamic instructional rosters
