ECRISS 3.14.0
February 21, 2022 Release Notes

The ECRISS 3.14.0 release includes the following new features as well as updates to improve user experience.

School Improvement app
The following features and updates are now available:

NEW! Student Search
A search bar is now available at the top of the School Improvement app! Users will only be able to search students who they have permission to view.

Searching a student will bring a user to a page showing the student's assessment history – a page previously only accessed by clicking on a student's name in the List Students window on a scatterplot page.

The following features and updates are now available:

NEW! ROI List Report

A new ROI List Report is now available on the School Improvement Groups page! For users with access to ROI Analysis for groups, an ROI List Report button is available at the top of the Groups page.

The ROI List Report opens a window and allows users to select groups with existing ROI Analysis reports. A user can then generate a ROI List Report PDF that displays all selected groups in a table format with additional ROI information.

The following features and updates are now available:

NEW! Insights Button

A new Insights button is now available on growth chart and projection chart pages! The Insights button is located in the bottom left corner at the bottom of the page.

The Insights button opens a window that displays more information about the students who took the assessment.

If available for the assessment, the top of the Insights window displays a subtest performance chart of students' performance levels on the assessment's subtests.

Below the subtest chart, the Insights window lists all student groups and the number and percentage of students who took the assessment that are in each group.
